1. What is PYM Split?

PYM Split is a web app to **split expenses** among friends, family, or roommates.

It allows you to:

- Track who paid what.
- Automatically split expenses among participants.
- Know who owes whom.
- Work with multiple currencies at once.
- Archive closed trips or expenses.
- Export data to **Excel (CSV)** or **Word (RTF)**.

The app works **in any modern browser** (Chrome, Safari, Firefox, Edge) and can be **installed as an app** on your phone.

2. How to access

First time (sign up)

1. Open the URL: <https://rueloparo1145-star.github.io/PYM-Split/>
2. Tap **Create account** .
3. Fill in:
 - **Full name** → your name.
 - **Email** → your email address.
 - **Password** → minimum 6 characters.
 - **Invite code** → ask the administrator for it.
4. Tap **Create account** .
5. You are in!

Next times (sign in)

1. Open the same URL.
2. Enter your email and password.
3. Tap **Sign in** .

3. Login screen

Element	Purpose
Sign in	Log in with an existing account
Create account	Create a new account (requires invite code)
Email	Your email address
Password	Your password
Sign in (button)	Submit credentials and enter

4. Main dashboard

This is the screen you see after logging in.

4.1. Top header

Button	Purpose
Manual	Opens this manual as a PDF
?	Opens the manual inside the app
Friends	Manage your friends list and requests
Profile	Edit your name, preferred currency, language
Sign out	Log out of your account

4.2. Greeting and "See history" button

- **Hi, [your name]** → personalized message.
- **See history** → opens a bar chart with the last 12 months of spending.

4.3. Range tabs

- **Active groups** → only groups with pending expenses.
- **Archived groups** → closed and archived groups.
- **All** → all groups.

4.4. Statistics cards

Card	What it shows
Total spent	Sum of expenses in the selected range
They owe you	Total others owe you
You owe	Total you owe

4.5. Recent activity

List with the **5 most recent expenses** across all your groups.

4.6. My Groups

List of all your groups with name, type, currency, total, and your share.

Button	Purpose
	Archive a group (must be closed first)
	Delete a group (only archived groups)
	Restore an archived group

4.7. "+ New" button

Create a new group. See **section 5**.

4.8. Floating "+" button

Quickly add a new expense. See **section 7**.

5. Create and manage groups

5.1. Create a group

1. On the dashboard, tap **+ New** above "My Groups".
2. Fill in the form:

Field	Description
Group name	E.g. "Trip to Bariloche", "Apartment", "Friday dinner"
Type	Trip, Apartment, Outings, Other
Currency	Group's main currency (e.g. EUR, USD, ARS)
Start date (optional)	Date the group starts
End date (optional)	Date the group ends
Manual rate (optional)	If the currency isn't available online, set a manual rate
Test API	Checks if the currency has an automatic rate

3. Tap **Create Group** .

You become a member of the group automatically. You can then add your friends.

5.2. Open a group

Tap any group. The detail view opens with: balance, expenses, members, charts, and history.

5.3. Edit a group

Open the group → tap on the group name. You can change name, type, currency, dates, and manual rate.

5.4. Archive a group

Important: you can only archive a group **after closing the calculation** (see section 11).

1. Open the group.
2. Tap **Close calculation** .
3. Go back to the dashboard.
4. Tap the  button of the group.
5. Confirm.

5.5. Restore an archived group

1. On the dashboard, tap **Archived** .
2. Find the group.
3. Tap .

5.6. Delete a group

Warning: you can only delete an archived group. All its content is deleted.

6. Add and manage members

6.1. Add a member to a group

Requirement: that person must be in your **Friends** list (see section 13).

1. Open the group.
2. Scroll to the **Members** section.
3. Tap  **Add member** .
4. Select the friend from the list.
5. Tap **Add** .

6.2. View members

In the group detail, the **Members** section shows all participants as "chips" with their name.

7. Add and manage expenses

7.1. Add an expense (from the dashboard)

1. Tap the floating  (bottom right).
2. Fill in the form:

Field	Description
What was it?	Short description. E.g. "Dinner", "Taxi", "Groceries"
Amount	Expense amount
Group	Which group it belongs to
Who paid?	Who put in the money
Currency	Currency it was paid in
Category	Food, transport, accommodation, etc.
Split type	How it's divided (see section 8)
Split between	Check the participants

3. Tap **Save Expense** .

7.2. Add an expense (inside a group)

1. Open the group.
2. In the **Expenses** section, tap  **Add** .

3. The "Group" field is pre-filled.
4. Fill in the rest.

7.3. Edit an expense

1. Open the group.
2. Tap the expense.
3. Tap **Edit** .
4. Change what you need.
5. Tap **Save changes** .

7.4. Archive an expense

1. Open the group.
2. Tap the expense.
3. Tap **Archive** .
4. Confirm.

The expense is not deleted. It's archived and **no longer counts** toward the balance. You can restore it later.

7.5. View archived expenses

Scroll to the expenses section and tap  **View archived expenses** .

From there you can view the detail or tap  **Restore** .

7.6. Filter expenses by category

Use the **All categories** selector to filter.

8. Split types

8.1. Equal parts

The total is divided equally among selected people.

Example: 60 EUR among 3 people → 20 EUR each.

8.2. By percentage

Assign a % to each. **Must add up to 100%.**

Example: 100 EUR → 50% for A, 30% for B, 20% for C.

8.3. Exact amounts

Enter the exact amount for each. **Must add up to the total.**

Example: 100 EUR → 40 for A, 35 for B, 25 for C.

8.4. By shares

Each person has N shares. Distributed proportionally.

Example: 3 shares → A has 2, B has 1. A pays 2/3 and B pays 1/3.

8.5. Check / uncheck participants

You can **check or uncheck** people to include or exclude them from the split.

9. Multiple currencies and rates

9.1. Group currency

Each group has its **main currency** (e.g. EUR, USD, ARS, MXN...).

9.2. Expense currency

Each expense can be in **any currency**. The app converts automatically to the group balance.

Example: group in EUR, expense in USD → the app stores the rate at that moment and shows the amount in EUR.

9.3. Automatic rates

The app fetches rates from 2 sources:

- **Frankfurter** (European Central Bank): EUR, USD, GBP, MXN, BRL, CLP, etc.
- **DolarAPI** (Argentina): ARS and other Latin American currencies.

9.4. Manual rate

If the currency is not in either source, you can set a **manual rate** when creating the group.

9.5. Test API

In the create-group form, the **Test API** button checks if the currency has an automatic rate available.

10. Balance and settling debts

10.1. View the balance

In the group detail, the **Balance** section shows:

- Who owes whom.
- How much, already converted to the group currency.
- **Settle** button to register a payment.

The app **simplifies debts**: if A owes B and B owes C, it directly shows A paying C.

10.2. Settle a debt

1. Tap **Settle** next to the debt.
2. Confirm the amount.
3. The balance is updated.

Important: the app does NOT move real money. It only records that the debt was paid outside the app.

11. Close and archive a group

11.1. Close the calculation

1. Open the group.
2. Tap **Close calculation** .
3. Confirm.

The app saves: closing date, final total, and rate at that moment.

11.2. Reopen the calculation

1. Open the group.
2. Tap **Reopen** .
3. Confirm.

11.3. Calculate in today's rate

In archived groups, the **Calculate in today's rate** button appears. It shows:

- Total with the rates at the time of the trip.
- Total with today's rates.
- Difference (how much it went up or down).

It's informative only. **It does not modify any data.**

11.4. Archive the group

See section 5.4.

12. Export data (CSV and RTF)

In the group detail, at the top, there are 2 buttons:

12.1. Export CSV

Generates a `.csv` file that opens in **Excel**, LibreOffice, or Google Sheets.

It contains 3 blocks:

- Group info (name, currency, dates, totals).
- Totals per person (table).
- Expenses (detailed table with splits).

12.2. Export RTF

Generates a `.rtf` file that opens in **Word**, LibreOffice Writer, or Google Docs.

It contains the same as the CSV but **with formatting**: tables with borders, colors, alternating rows, and bold headers.

Ideal for presenting or printing.

13. Friends and invitations

13.1. Add a friend

1. On the dashboard, tap **Friends** .
2. In the **Add friend by email** field, type their email.
3. Tap **Send** .

Your friend will receive a request. When they accept, they will appear in your list.

Requirement: your friend must be registered with that same email.

13.2. Accept a request

1. Tap **Friends** .
2. In **Pending Requests** you'll see the ones sent to you.
3. Tap **Accept** or **Reject** .

13.3. View your friends

In **My Friends** you'll see all accepted friends.

13.4. Add a friend to a group

Once you're friends, you can add them as members of any group (see section 6).

14. User profile

Tap **Profile** in the header.

14.1. Editable fields

Field	Description
Email	Not editable (it's your account)
Name	Your visible name
Phone	Optional
Preferred currency	Currency you see dashboard totals in
Language	Spanish or English

14.2. Export my data

At the bottom of the modal, the **Export my data** button downloads a JSON with all your data.

Useful for backups.

15. Manual and help

In the header there are two buttons related to help:

15.1. "Manual" button (PDF)

Opens this document as a PDF in a new tab.

15.2. "?" button

Opens the manual inside the app with the same sections but in HTML format.

16. Frequently asked questions

Question	Answer
Does the app move money?	No. It only records expenses and calculates who owes whom.
Can I use multiple currencies?	Yes. Each group has its currency, and you can add expenses in any other.
What if the currency isn't online?	You can set a manual rate when creating the group.
What if I make a mistake?	You can edit or archive the expense.
Does it work offline?	Partially. It needs a connection to load and save data.
Who sees my expenses?	Only members of each group.
How many people per group?	No limit.
Same account on multiple devices?	Yes. Log in with the same email.
Does it work on iPhone and Android?	Yes. It's a PWA (progressive web app).

17. Glossary

Term	Meaning
PWA	Progressive Web App. A web app that can be installed on your phone.
Split	Division of an expense among several people.
Calculation	The group total with the rates at the time.
Rate	Exchange rate between two currencies.
Balance	Difference between what you paid and what you owe.
CSV	File format for Excel.
RTF	File format for Word.
